Of course, we have to remember that even if we plan for these steps, we must also follow the children's interests and see what they want to discover. This template is an outline of our own discussions and will be edited to reflect how we have followed the children's interests in our classrooms in regards to the theme. Each step should include information on the knowledge to be developed. You do not need to write on this planning how you intend to do that.

At the end of the theme, after editing, this document should be passed to Shaun Hopper to be put into the curriculum planning folder (not before you have made your own copy of course). You do not need to edit it using a laptop. Written on plans would be ok.

Remember to plan for retrieval of key vocabulary and knowledge throughout the theme.
